

**IN THE SPECIFICATION:**

On page 2 of the Office Action mailed August 7, 2006, the Examiner required Applicants to correct the specification for apparently missing letters. Upon a careful examination of the specification as posted on USPTO website, Applicants determined that informalities (missing letters) occurred probably when the originally filed specification was scanned. Accordingly, a copy of the original specification having a better image quality than the originally filed specification is filed as Substitute Specification herewith. No new matter has been added. Applicants respectfully submit that the Substitute Specification is the same as the originally filed specification.
